PROFILE

I am a novice Full Stack Web Developer with a strong inclination to consistently acquire new techniques, occasionally thinking innovatively, to enhance the flow of ideas within the team, and to discover alternative yet efficient solutions in bug resolution.

EXPERIENCES

Junior Full Stack Web Developer Trainee

Boolean (Jan. 2024 - Jul. 2024)

- I created a Vue application akin to Netflix, designed to search for movies and TV series based on language or nationality. This application communicates with an external database to retrieve the necessary information.
- I collaborated on the development of a D&D-style game with a team.
Full Stack technology (Vue and Laravel) devoid
Implementing game mechanics involves creating characters and managing their inventory.
- At the conclusion of the course, our team created an application similar to AirBnB using Full technology for the final project.
In this project, we utilized a stack comprising Vue and Laravel.
Discovered the method to enable side authentication.
We utilized Laravel for the front-end.
Exclusively utilizing an API call server and Vue for the front-end.

Sanremo Bar Manager

Leporano (July 2011 - January 2019) - (April 2022 - October 2023)

My initial job where I completed my apprenticeship. Enhanced communication skills and interfacing. The client. Subsequently, I assumed the position of Manager.

Leader at Alba Tramezzini

Faggiano (June 2019 - March 2022)

I held the position of Team Leader. At this location, I acquired insights into work dynamics. Optimizing team and production flow. Enhancing problem-solving in real-time. Issues were presented.

TRAINING

Professional Full Stack Web Developer

During the period from January 2024 to July 2024, I participated in a six-month bootcamp focused on mastering primary frontend, backend, and framework languages. The program spanned 700 hours, comprising theoretical classes in the morning and hands-on exercises in the afternoon.
